HEALTHCARE THE WAY IT SHOULD BE

Real care. Real time. Real *you.*

Direct Primary Care that puts **you** back at the center —
unhurried visits, your doctor a text away, and a whole practice
of services under one roof.

Memberships from **\$99/mo**

Weight loss from **\$27**

20+ years caring for families

Meet Dr. Tess Garcia

Portrait of Dr. Tess Garcia

images/dr-tess.jpg

— Dr. Tess

- Board-certified in **Family Medicine**
- Board-certified in **Obesity Medicine** (DABOM)
- Fellow, **American Academy of Family Physicians** (FAAFP)
- **20+ years** serving the Kansas City metro

A former music teacher turned physician, **Dr. Theresa “Tess” Garcia** brings rare warmth, patience, and cultural understanding to medicine. As a Mexican-American and Native-American doctor — and the first woman physician in Grain Valley — she has spent her career caring for families, veterans, and the people too often overlooked by rushed, traditional healthcare.

She built Garcia Family Medicine on a simple idea: **healthcare should feel personal again.** No phone trees. No gatekeepers. No ten-minute appointments. Just a doctor who knows your name, answers your text, and has the time to truly listen.

Her commitment isn't only professional — it's personal. Dr. Tess lost **80 pounds herself** using the very same evidence-based approach she now offers her weight-management patients. She doesn't just prescribe the journey; she's walked it.

“You are not a number on a schedule. You are my patient, and your time with me is yours.”

The Direct Primary Care Difference

Direct Primary Care (DPC) removes insurance from the exam room. Instead of billing your visit, you pay one simple monthly membership — and in return you get your doctor's time, attention, and direct line. It's the modern version of the family doctor who actually knew you.

30–60

Minutes per visit, not 10

Text, call & email access

Reach Dr. Tess directly

Text, call, or email your physician — no front-desk maze, no waiting on hold, no gatekeepers between you and your doctor.

Time to truly listen

Appointments run 30–60 minutes. We dig into the “why,” not just the symptom — the way good medicine is meant to be practiced.

Transparent pricing

One flat monthly fee. Wholesale labs and medications at a fraction of retail. No surprise bills, ever.

One doctor, the whole way

The same physician every visit, coordinating every part of your care — so nothing about your health gets lost between providers.

Direct Primary Care Membership

\$99 / month

First visit **\$200** — includes your first month plus a full comprehensive health assessment. Adults & families welcome.

Your membership is the foundation of everything we do — unlimited access to your physician for the care you need, when you need it.

- ✓ Unlimited office visits — no per-visit charge
- ✓ Same-day & next-day appointments
- ✓ Annual physicals & preventive care
- ✓ Wholesale-price labs & medications
- ✓ Direct text, call & email with Dr. Tess
- ✓ Chronic-disease management
- ✓ In-office procedures & minor care
- ✓ Care coordination & referrals

Works beautifully alongside a high-deductible or catastrophic plan — keep insurance for the big stuff, use GFM for everyday care.

Medical Weight Management

This isn't a fad diet or a one-size-fits-all program. Dr. Tess is **board-certified in Obesity Medicine** and builds a personalized, physician-supervised plan around your body, your labs, and your life.

When appropriate, that includes the latest **FDA-approved medications (GLP-1s and more)**, alongside nutrition, metabolic, and lifestyle coaching — all guided by a doctor who has personally lost **80 pounds** on this same approach.

Every step supervised

What's included

- ✓ Metabolic & body-composition assessment
- ✓ Prescription medication when right for you
- ✓ Nutrition & lifestyle coaching
- ✓ Ongoing progress tracking & support

CoreLift™ Pelvic Floor Therapy

Bladder leaks and pelvic-floor weakness are common — and quietly life-limiting. CoreLift offers a comfortable, non-invasive way to rebuild that core strength, no surgery and no downtime.

CoreLift uses **FDA-cleared EMSELLA technology** to deliver **thousands of pelvic-floor contractions** in a single session — the equivalent of thousands of Kegels — while you sit comfortably and **fully clothed**.

Each session is just **28 minutes**. The typical protocol is **six sessions over three weeks**, and **95% of patients** report meaningful improvement in bladder control and quality of life.

28 min

Per session, fully clothed

6 in 3

Sessions over three weeks

95%

Report real improvement

Helpful for stress, urge & mixed incontinence — and for women after childbirth or menopause, and men after prostate treatment.

Everything, Under One Roof

Beyond your membership, GFM brings together the services families usually have to chase across town — coordinated by the doctor who already knows you.

Mental Health Care

Compassionate, judgment-free support for anxiety, depression, stress and more — integrated with your whole-person care.

Pelvic Health

Comprehensive evaluation and treatment of pelvic-floor concerns, incontinence and related conditions — including CoreLift.

DOT Physicals

Certified commercial-driver medical exams done thoroughly and on your schedule — get back on the road with confidence.

Independent Medical Exams

Objective, detailed IMEs for employers, attorneys and insurers — handled with professionalism and care.

Wellness Coaching

Personalized guidance on nutrition, movement, sleep and habits — built to fit your real life, not a template.

Family & Preventive Care

Physicals, screenings, chronic-condition management, acute illness and ongoing primary care for the whole family.
